

Elizabeth N. J. Dec 29, 1891

My Dear Sir

I trust the material sent you to day
for mail is sufficiently perfect for your
purpose. *N. flava* increases so readily by runners
that seed is seldom saved.

It will be interesting to have the status of
N. Mexicana determined. It certainly differs in
its seed flowering habit from *N. flava*.

With regards I am

Yours Truly

J. H. Seward

Sent one leafy bud

Two flowers - ovary
